**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of the invention of group II, claims 13-21 in Paper No. 5 is acknowledged.

***Drawings***

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 10, 12, 14, 16 (page 1), and 120a & 120b (page 10, line 1). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: "236" in Fig. 14c. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because reference sign "230" appears to indicate a material layer in Fig. 14b, but the specification describes it as an opening in line 8 of page 12.

***Specification***

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

6. The abstract of the disclosure is objected to because it exceeds 150 words.

Correction is required. See MPEP § 608.01(b).

7. The disclosure is objected to because of the following informalities: in line 10 of page 10, "9" should be replaced with --9b--.

In line 18 of page 10 the notation  $2-4 \times 10^{15}/\text{cm}^2$  is used to describe a concentration. Concentrations must be described in terms of cubic centimeters, not square centimeters.

Appropriate correction is required.

### ***Claim Objections***

8. Claims 17-19 are objected to because of the following informalities: the claims use the notation  $2-4 \times 10^{15}/\text{cm}^2$  to describe a concentration. The term " $2-4 \times 10^{15}$ " should be replaced with " $2-4 \times 10^{15}$ ". Additionally, a concentration cannot be expressed in terms of square centimeters, cubic centimeters should be used unless it is the intention of the applicant to describe a dose. The term  $\text{cm}^2$ , should be expressed as  $\text{cm}^2$  or  $\text{cm}^3$ . Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

9. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

10. Claims 13-21 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 13 recites the limitation, ..."removing a portion of said first nitride mask to expose a portion of said silicon region..." in part (e) of the claim. The specification does not disclose exposing a portion of the silicon region by removing a portion of the first nitride mask.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas W Owens whose telephone number is 703-308-6167. The examiner can normally be reached on Monday-Friday.
